Editor in Chief, JPOA

Message from President Pakistan Orthopaedic Association (POA)

It is indeed a matter of great pleasure for me to write these introductory words for the Pakistan Orthopaedic Association's (POA) official fellowship announcement. The Pakistan Orthopaedic Association (POA) has come a long way in its very short history and is expeditiously progressing towards its goal of becoming a leading professional organization in the international ranking. The reason for this remarkable success story lies in its constant pursuit and focus on education and hands-on training.

During the last few years, POA has focused on its national fellowship programs. There are 114 opportunities for national fellowships in the following subspecialties across various centers in Pakistan:

- Arthroplasty
- Deformity Correction & Bone Regeneration
- Hand Surgery
- Orthopaedic Oncology
- Paediatric Orthopaedics
- Sports Surgery and Arthroscopy
- Spine Surgery
- Trauma

Last term, we received 184 applications for POA National fellowships, which shows the interest of young blood towards the subspecialties. Selection of the candidates was through a very transparent process according to criteria that have been developed by the previous executive boards.

In order to maintain the quality of POA fellowships, the POA Executive Board has worked the entire year to improve the guidelines, criteria for fellowship centers, supervisors, and fellows.

At the end, I would like to emphasize that POA is the only association that has provided a great platform to our young Orthopaedic surgeons for getting subspecialty training and fellowships.

I can visualize that in the near future, surviving without subspecialty training in this country will be very difficult for an Orthopaedic surgeon. Now is the time for you to come forward and avail this opportunity so that you don't stay behind in your professional career.

With Best Regards,

Prof. Tahseen Riaz
President, Pakistan Orthopaedic Association (POA)

Message from Chairman, Research and Education Committee, POA

I take great pleasure in writing this message as the Chairman of the POA Research and Education Committee. As you all know, POA is the only Orthopaedic organization consisting of over 1800 members, and it is actively engaged in advancing academic initiatives.

One of POA's notable achievements is the establishment of POA Sub-specialty forums. Another significant milestone is the recognition of POA Centers for subspecialty training. Initially, only three sub-specialty centers received recognition. In 2012, the number of recognized centers grew to six, and subsequently, from 2015 to 2017, there was rapid expansion. The POA Research & Education Committee recognized 18 subspecialty Centers, and today, 29 Centers offer hands-on training in almost all subspecialties.

To date, these Subspecialty Centers of POA have provided one-year hands-on training individuals and six-month training to 114 POA Life members. It is a testament to the great dedication and enthusiasm of our mentors that these centers have achieved international recognition. A significant number of "International applicants" now seek Sub-specialty training at our Centers in Pakistan, which is a great honor and a promising sign for our community, "POA."

This year, the POA Research & Education Committee is pleased to announce 150 scholarships, including opportunities in Trauma, Arthroplasty, Spine Surgery, Hand Surgery, Musculoskeletal Tumors, Deformity Correction and Limb Lengthening, Pediatric Orthopaedics Surgery, and Sports Surgery & Arthroscopy for POA members, particularly young Orthopaedic surgeons.

POA Zindabad!

POA Paindabad!

With best regards,

Prof. Abu Bakar Siddiq

Chairman

POA Research and Education Committee

Aim and Objective

Introduction

After completing PMC Level-III training, the orthopaedic surgeons can obtain training at Level-IV through sub specialty fellowship training. Priorities for establishing a sub-specialty program fellowships in Orthopaedic Surgery are based on community needs and availability of infrastructure for the sub-specialty, which are mandatory for accreditation of the programs, the first time and every time.

Vision/Mission

The sub-specialty fellowship training in Orthopaedic Surgery will ensure in depth knowledge, high quality of skills and attitudes essential for Orthopaedic Surgeons to solve complex musculoskeletal problems of human body in area of their subspecialty, adequately as an accomplished competent sub specialty expert

List of Subspecialty Fellowships

POA has identified following sub- specialties to start fellowship training of one year in each.

1. Trauma
2. Arthroplasty
3. Spine Surgery
4. Hand & Plastic Reconstruction
5. Musculoskeletal Tumors
6. Deformity Correction and Limb Lengthening.
7. Pediatrics Orthopaedics
